

Fuel Management Solutions reduce **COST** and **RISK**

FUEL COSTS

- Fuel and Lubricant costs are a large part of operating costs
- There is no significant paradigm shift to alternative sources of fuel in remote operations in the short term
- The costs of fuels and lubricants set to rise into the future
- Some progress has been made in the efficiency of engines
- Fuels and lubricants are marginally more efficient
- Environmental levies are set to be a reality for carbon burners
- Capital expenditure on new and upgraded facilities

FUEL RISKS

- Availability when and where needed
- Poor quality fuels and lubricants
- Product contamination from water, dirt, corrosion, foreign material
- Losses through theft, leakage, mismanagement
- Environmental damage and noncompliance
- HSSE exposures to people and environment
- Security
- Integrity of systems and records for compliance and tax

FUELFIX and TANKS2GO

- Fuelfix and Tanks2Go provide integrated fuel and lubricant handling, storage and management solutions
- ie. “FUEL MANAGEMENT SOLUTIONS”
- Skilled people to design, build, install and commission, facility manage.
- Specialised fuel and lubricant capital equipment
- Hire and/or Buy of self bunded fuel tanks
